----------------	--------------------------	---------------

<b>Objective</b>	A passionate graduate in Computer Applications, keen to build a career in development. Quick to learn and highly adaptable, with a strong ability to work effectively in teams. Eager to contribute skills and enthusiasm to innovative projects and dynamic environments.
------------------	--

<b>Project</b>	<b>FAKE NEWS DETECTION USING ML</b>  This project was developed by my friend Sanjay Rajashekar and me, under the guidance of Ms. Sudha. It is based on machine learning and aims to predict the authenticity of news input in the form of text, determining whether it is real or fake using machine learning algorithms. In this project, I played a pivotal role, being responsible for both the front-end and back-end development. For the front-end, I utilized HTML, CSS, and Bootstrap to create an intuitive user interface. On the back-end, I developed the functionality using Python and Flask, ensuring seamless integration and accurate predictions
